10	7.5	75 units	
11	7.5	75 units	
12	7.5	75 units	

- Tirzepatide injection is a glucose-dependent insulintropic polypeptide (GIP) receptor and glucagon-like peptide-1 (GLP-1) receptor agonist.
- At therapeutic doses, it acts on the brain and suppresses appetite. Used in conjunction with a health diet and exercise, Tirzepatide helps patient adhere to a reduced-calorie diet, enhancing the weight loss process.
- **Drug Tolerability and weight loss are patient dependent.**
- Continue to exercise and eat healthy, continue any vitamins or supplements.
- Injectable Tirzepatide can be administered with or without food.
- If you need to change the day of the week, ensure the previous dose was given 3 or more days before
